DRIVE-IN RACKS

Provides the maximum level of cost-effectiveness, quality, and safety for compact storage of palletized goods. The load is stored in depth and height with a single aisle for all lanes. Strict control of input and output.

LONGSPAN SHELVES

Lighter in duty Pallet Racking system, Longspan racking is an ideal solution for situations where handloaded stocking is required. The system can also be adapted for hanging garments and is an ideal stockroom storage solution. This product range forms the basis of the integrated Longspan System – perfect where a full merchandising offer is required.

MEZZANINE FLOOR

Space is always at a premium in stock areas, and a mezzanine floor may give the extra area needed by making use of overhead space. Each mezzanine floor is created to exactly fit the required area, and can double or even triple stock storage areas. Floors are constructed on a steel frame with a choice of decking materials and can be designed for specific load requirements. The floor is then manufactured and built to an agreed programme and finally fitted with handrails, pallet gates and stairs.

SELECTIVE PALLET RACKING

The Selective Pallet Racking offers a huge range of options in height, depth, width and loadings, with adjustable beam pitches of either 50mm or 75mm. This enables any requirement to be accurately achieved. Racking can be formatted to any layout allowing any access aisle need to be catered for.

CANTILEVER RACKING

Overhanging shelving system for very big or long loads, such as bars, pipes, profiles, wood, or any other material difficult to store in conventional shelving facilities. It is adjustable in height and is available for medium-size loads.

SLOTTED ANGLE SHELVES

Offers manual access to all shelves and allows storing and sorting light materials at different heights. Adaptable to any space and very useful for factories, workshops, shops, archiving. Manufactured with high-resistance steel and high quality finishing. Shelves are adjustable in height with a wide range of sizes available.
